**Arie Lukkassen, Vice President, PDFM**

We are thrilled to announce the promotion of Arie Lukkassen to Vice President. Arie joined PDFM two years ago as Director of Operations, where he has been responsible for the operations across PAE's Japan businesses as well as supporting other projects in the region.

Born and educated in the Netherlands, Arie spent 20 years at Honeywell at various positions from engineering to general management. After working in Europe, Arie moved to the Asia-Pacific region in 1992, worked in Australia initially, then served as regional management executive in Hong Kong before moving to Japan.

In Tokyo, he was part of the Johnson Controls' Management Team and responsible for implementation of Department of Defense (DoD) mega projects at MCAS Iwakuni and other large energy-related projects at various bases in Japan.

Please join me in congratulating Arie to his new and well-deserved role at PDFM!

**PAE Design & Facility Management**
